DEVON & JONES® crownlux PERFORMANCE™

The Next Generation of Performance

What's So Special About CrownLux Performance™ Polos?

You'll love our innovation in performance fabric technology. Devon & Jones' CrownLux Performance™ fabrics offer superior moisture-management, UV protection and travel-ready ease with an impressive professional look and feel.

How Did We Do It?

By using superior fabrics showcasing key trends such as soft mélanges, cotton hand-feels and performance aspects, our quality and innovation are second to none. And it's in our signature corporate styles like the CrownLux Performance™ Plaited Polo family on pages 28-31, where we flipped the script on fabric engineering by knitting strong, smooth wicking polyester on the outside and plaiting it to soft-as-cotton wicking blend on the inside. The result? An incredibly luxurious fabric with the performance features you demand and softness you want next to your skin.

Luxury, Comfort & Performance in One

Complete your look with our CrownLux Performance™ dress shirts on pages 98, 99 plus knits and layering pieces on page 70. They are the right balance of comfort and performance.

Utk SubDown™

UTK SubDown™ is a revolutionary insulation technique that mimics the thermal qualities of down, using an easy-care material that is more hypo-allergenic.

Traditional polyfill batting requires thick, uncomfortable layers to achieve maximum thermal protection from the cold.

UTK SubDown™ fibres mimic the physical dimensions of down and are blown into the garment channels just like down. The result is a lightweight lofty fill with more air pockets and the thermal retention of 600 fill down.

UTK SubDown™ is the ideal in "warmth without weight" insulated garments.

Utk Hydropel™

UTK Hydropel™ technology adds superior water-repellent functionality to fabrics.

North End® utilizes UTK Hydropel™ technology in many ways, including seam-sealed waterproof garments for severe wet weather conditions, water-resistant fabrications with a built-in membrane for enhanced wind protection, or a simple DWR (durable water repellent) finish on a lightweight shell. Whatever the level of weather protection needed, North End® has a solution.

UTK Hydropel™ technology adds superior water-repellent functionality to fabrics.

North End® utilizes UTK Hydropel™ technology in many ways, including seam-sealed waterproof garments for severe wet weather conditions, water-resistant fabrications with a built-in membrane for enhanced wind protection, or a simple DWR (durable water repellent) finish on a lightweight shell. Utk Hydropel™

UTK Hydropel™ technology adds superior water-repellent functionality to fabrics.

North End® utilizes UTK Hydropel™ technology in many ways, including seam-sealed waterproof garments for severe wet weather conditions, water-resistant fabrications with a built-in membrane for enhanced wind protection, or a simple DWR (durable water repellent) finish on a lightweight shell. Utk CeramiTech™

UTK CeramiTech™ is a state-of-the-art technique that creates the ultimate in lightweight thermal protection.

The unique technology encapsulates ceramic powder in an emulsion that is then 'printed' on the underside of the fabric.

The UTK CeramiTech™ surface reacts with the body by absorbing & retaining body heat to keep the wearer warm.

UTK CeramiTech™ styles are great on their own or as a layering piece under a shell or puffer.

UTK Hydropel™

UTK Hydropel™ technology adds superior water-repellent functionality to fabrics.

North End® utilizes UTK Hydropel™ technology in many ways, including seam-sealed waterproof garments for severe wet weather conditions, water-resistant fabrications with a built-in membrane for enhanced wind protection, or a simple DWR (durable water repellent) finish on a lightweight shell. Whatever the level of weather protection needed, North End® has a solution.

Make a conscious choice.

The Ultimate Tee.

A Collection that is good for you and good for our planet.

**Optimal
Weight**

The Ultimate Tee fabric is a 4.8 oz./yd² / 165 gsm, 60% cotton, 40% poly blend. It is 15% heavier than most basic 30's tees, the perfect weight for a fashion t-shirt.

Our polyester fibre is made from recycled content including plastic bottles. Recycled poly consumes less petroleum, emits fewer greenhouse gases and conserves water and energy.

**Better
Cotton**

We are proud members of the BCI/Better Cotton Initiative. Our cotton products support more sustainable cotton farming. Better Cotton is sourced via a system of Mass Balance.

**Cationic
Heathers**

Our heathers are dyed using 70% less water, 65% less energy and almost no chemicals.

**RFID
Enabled**

Select styles and colours are offered with digitally enabled RFID tags, unlocking endless possibilities for tech savvy marketers and event planners.
